

The XM Satellite Radio is a great invention and has helped me especially when I need to listen to certain music. It is perfect for me. I do not think it is fair for any broadcasting system to go against everything XM stands for. XM radio gives every listener what they want to hear. The FM and AM radio stations do not give me the music i want to listen to at that moment or the station is playing a whole bunch of commercials. Having to drive over 7 hours to college, I need variety in the stations to keep me awake. As for the weather and traffic station, I need to know what is happening on the major roads I travel on, such as the PA turnpike and route 81. Thank you very much for your time and have a nice day.
